Good Morning ____, Do you have a
minute ?

Pastor Anil Singh

How did
this
happen?

How Did This Happen?

- 1) It wasn't from Anil's actual email address
- 2) Only a few of his contacts received the fake email

CONCLUSION:

It probably wasn't Anil's email address that was hacked.

As a precaution, we checked to make sure that the hacker didn't get in Anil's email and put in filters.

How do you get to “Filters” (AKA Filter Rules)? Regardless of the email provider, filters are almost always under email settings.

Settings

General Labels Inbox Accounts Filters and Blocked Addresses Forwarding and POP/IMAP Add-ons Chat and Meet Advanced Offline Themes

The following filters are applied to all incoming mail:

Select: [All](#), [None](#)

[Export](#) [Delete](#)

[Create a new filter](#) [Import filters](#)

The following email addresses are blocked. Messages from these addresses will appear in Spam:

You currently have no blocked addresses.

Select: [All](#), [None](#)

[Unblock selected addresses](#)

No filters were found – another reason to conclude that Anil's email wasn't hacked.

As a precaution, Anil still
changed his password.

So, if Anil's email wasn't hacked, what did happen?

Someone else's email was hacked, and addresses were stolen.

Let's look at an example of
when a person's email was
hacked, and messages
were sent out.
